5th Grade June Newsletter

Greetings!

We are quickly approaching graduation and the end of the year senior activities. Please look out for letters daily.

Math

In math, we are ending our coordinate geometry unit. We have learned to graph on the coordinate plane. We have been plotting points on the x-axis and the y-axis. We have been also working hard to describe different graphs using specific terminology.

Reading

We have been working together in book clubs in our Fantasy unit. We are enjoying looking at who holds power in the books we read. We are continuing our work on note-taking while reading.

Writing

In writing, we are working hard on our memoirs. We are digging deep into our lives and writing about times that have been hard, challenging, amazing, and more. We are incorporating feelings and emotions into our writing in order to express a big message.

Social Studies & Science

In Science and Social Studies, we have been wrapping up our end of the year units. We are finishing our unit on food and nutrition. We are continuing to use language frames, tier two and three vocabulary, and sentence deconstruction to help us close read.
