

P.S. 182

5th Grade May Newsletter

Greetings!

We are done taking our exams for this year! Now, we are preparing for senior activities!

Math

In math, we will begin our coordinate geometry unit. We will learn how to graph coordinate points on the x and y axes. We will also be reviewing perimeter and area. We will calculate and compute various numbers to solve multi-step word problems within these contexts. Please remember to log online to Pearson for additional resources and practice.

Reading

We are working hard in our fantasy reading unit. We are working together, in our book clubs, to notice fantasy elements. We are enjoying looking at who holds power in the books we read. We are continuing our work on note-taking while reading.

Writing

In writing, we are working hard on our memoirs. We are digging deep into our lives and writing about times that have been hard, challenging, amazing, and more. We are incorporating feelings and emotions into our writing in order to express a big message.

Content Literacy: Social Studies & Science

In content area, we are finishing our unit on ecosystems. We will be heading into our unit on food and nutrition. We will be analyzing different foods and learning about nutrition in different countries.

Important Dates

May 1st & May 2nd: Mathematics State Exam

May 28th: Memorial Day: No School
